

THE GREAT WAVES OF CHANGE

By Marshall Summers

Background Information, Author Bio and Interview Questions

What Marshall Will Be Talking About

Humanity has crossed a critical threshold where we will have to adapt to a whole new set of circumstances—economic hardship, climate change and catastrophic weather, declining resources, loss of arable land and water and the growing risk of competition, conflict and war. These are the Great Waves of change and they are all beginning to converge upon the human family at this time. In the face of failing outside sources of authority —leaders, institutions and even governments, people are now thrown back upon themselves and must ask “How will I know what to do?” In his forthcoming book, *THE GREAT WAVES OF CHANGE: Navigating the Difficult Times Ahead*, Marshall Vian Summers will address this intensely personal dilemma, by revealing that there is a great inner resource within people, which will help them to see, to know and to act with renewed confidence in order to prepare to navigate a radically changing world. In the interview, Marshall will be speaking about the convergence of these Great Waves and the inner preparation and experience of inner certainty that will make all the difference in each person’s ability to move beyond fear and preference to see what is coming over the horizon and to make wise decisions in the uncertain times to come.
