

INTERVIEW QUESTIONS

For Kathleen Marden

Science Was Wrong

- ▶ Your book is titled *Science Was Wrong*. Yet it is obvious that both of you hold the scientific community in very high esteem. Was science wrong or was it related more to personal bias on the part of some scientists?
- ▶ Why do you think it is so difficult to advance new sound scientific ideas and discoveries?
- ▶ Your book has a chapter titled “Politics, Personalities and Childbed fever”. Tell us a little bit about childbed fever and why you wrote about it.
- ▶ “The Hemophilia Holocaust” sounds ominous. What caused the holocaust among hemophiliacs?
- ▶ You seem particularly passionate in your chapter titled “The Eugenics Movement in America”. When did you first learn about this movement and do you have a personal story to tell about it?
- ▶ You touched briefly upon the story of Carrie Buck describing her as a victim of the Eugenics Movement. Who is Carrie Buck and what is her story?
- ▶ You devote a chapter to Methyl-Mercury in the Food Chain. What is methyl-mercury and how does it differ from mercury?

- ▶ What causes methyl-mercury contamination and why is it dangerous?
- ▶ You wrote a powerful account of the devastating effect of methyl-mercury contamination in Minamata, Japan. What went wrong and what was the impact?
- ▶ Section 5 of your book has three chapters under the heading “Frontiers of Science”. What are the exciting new sciences?
- ▶ In “Extraordinary Visual Feats: Psi Phenomena” you wrote about the plight of Natasha Demkina. Who is she and what brought her to your attention?
- ▶ Is there reason to believe that some psychic phenomena are real?
- ▶ Tell me about UFOs and little green men.
- ▶ Are we being visited by aliens?
- ▶ Can you sum up why this book is important and tell us how you are taking it to the world?
