What is NASA hiding? Redfern Unearths New Evidence of Agency Cover-ups

"Nick Redfern [is] the Brit with a knack for ferreting out all the dope on outrageous subjects."

— Jim Marrs, best-selling author of *PSI Spies* and *Alien Agenda*

San Francisco, CA (December 1, 2010) -- Heading to the bestseller lists with another eyebrow-raising book, Nick Redfern is a notorious media darling and expert on unsolved mysteries, conspiracies and the paranormal. His new title, *The NASA Conspiracies: The Truth Behind the Moon Landings, Censored Photos, and The Face on Mars* opens the hidden door that NASA has keep closed for so many decades.

Established in 1958, NASA has led efforts to explore outer space, resulting in the Apollo missions to the moon, the Skylab space station, and today's space shuttle. All the while, behind the open, friendly face of NASA is a dark and mysterious, ominous world, a world littered with high-level cover-ups.

In his inimitable, lively, riveting style, Redfern reveals, in some cases for the first time, the truth and the fiction of how NASA is linked to high-level cover-ups, including:

- *Claims that the Apollo moon landings were faked in an effort to show military and technological superiority over the former Soviet Union*
- *The agency's role in hiding the truth about the controversial face on Mars, which many believe to be a carved structure created in the remote past by long-extinct, indigenous Martians*
- *NASA's deep and long-standing involvement with the famous UFO crash at Roswell*
- *Deep Throat-like NASA sources that have attempted to blow the lid on NASA's most guarded secrets*
- *NASA's secret knowledge of UFO visitations and the existence of alien life*
- *Allegations that NASA has a secret space program that runs alongside its publicly-visible operations, and has access to technologies far in advance of the space shuttle and conventional rocketry*
- *The reported discovery by NASA of what appear to be intelligently-designed structures on the surface of the Moon and Venus*
- *And much more of a cosmic and conspiratorial nature!*

About the Author:

Nick Redfern is a popular author, media guest and journalist who specializes in unsolved mysteries and government conspiracies. Among his many exploits, he has investigated and written about aliens in Mexico, lake monsters in Scotland, vampires in Puerto Rico, werewolves in England, ETs, Bigfoot, and crashed UFOs in the United States.

Redfern's previous bestsellers include:

Contactees: A History of Alien-human Interaction
Memoirs of a Monster Hunter: A Five-Year Journey in Search of the Unknown
Science Fiction Secrets: from Government Files and the Paranormal
Celebrity Secrets: Official Government Files on the Rich and Famous
There's Something in the Woods

He writes regularly for *UFO Magazine*, *Fate*, *Fortean Times*, and *Paranormal Magazine*, and makes frequent appearances on radio and TV, including the History Channel's "Monster Quest" and "UFO Hunters"; the National Geographic Channel's "Paranatural", and the Syfy Channel's "Proof Positive", among other programs.
