

THREE STORY ANGLES

Police Say Poltergeists Exist

(51 officers have reported incidents over the years)

In 17 cases since 1995, 51 police officers have reported poltergeist incidents, and 11 say they were assaulted. One officer even pulled a gun on an unseen force.

Poltergeist Energy May be related to Psychokinesis

(Making the connection is difficult but suggestive)

Some poltergeist agents, including a Canadian woman in her 40s, claim to have the ability to move things with their mind, and laboratory tests suggest this might be true in some cases.

Poltergeist Agents May Have an Electrical Connection

(The human brain, storms and electrical power may be sources)

Poltergeist *agents* may have unusual brains, with an ability to tap into outside energy sources, perhaps tension in a home, a storm or an electrical power source.
