

UFOs & ALIENS

by Nick Redfern

CHAPTER SUMMARY

Nick Redfern's new book, *The Real Men in Black*, is a study of the real-world equivalents of the Men in Black that, in 1997, were elevated to superstar status in the hit movie of the same name starring Will Smith and Tommy Lee Jones. Although the Hollywood blockbuster was fiction, the Men in Black really do exist, and they have consistently attempted to silence numerous witnesses to UFOs and paranormal phenomena since the early 1950s.

In his book, Nick Redfern delves deep into the sinister world of these mysterious operatives. He reveals their origins and discusses classic cases, previously unknown reports, secret government files, and the many theories that have been presented to explain the mystery.

Highlights of *The Real Men in Black* include: (a) the story of Albert Bender, the first man to claim an encounter with the Men in Black; (b) the involvement of the MIB in the famous Mothman saga that dominated the town of Point Pleasant, West Virginia in the 1960s; (c) encounters with the MIB at the site of one of the world's most famous monsters: Loch Ness; and (d) exclusive interviews with leading researchers of the MIB phenomenon.
