BOOK SUMMARY

Killing the Roswell Story

Living as we do in our 21st Century world, it is hard to imagine a significant news story, let alone an earth-shaking news story, ever being successfully covered-up, “spiked” or “killed.” With today’s 24/7 news cycle, broadcast news, cable news, news talk radio, the Internet, Blackberry’s, iPods, and hand-held, cell-phones with built-in video cameras, it is nigh impossible.

Back in 1947 – the year of the Roswell Incident – things were different. In rural New Mexico, electricity had not yet reached many of the outlying ranches, and most did not have radios and telephones. The only “outside news” was received via a weekly or monthly newspaper delivery. The country was only two years removed from World War II, and our military and government were still held in the highest esteem and regard in our history for vanquishing a dreaded enemy. Whatever they said was believed by most everyone.

June 1947 saw the coming of the saucers, the beginning of the modern age of UFOs. People all over the country were seeing strange things in the sky that the press had dubbed “flying saucers.” The phenomenon was two weeks old and still front page news on a daily basis when one of them crashed in remote New Mexico during the first week of July. Once the story hit the news wires, it became a world-wide sensation - for one day. Then it was gone, gone, gone. Completely. How was this possible?

“Killing the Roswell Story” will answer that question. It will take you through the steps and tactics that the then U.S. Army Air Corps employed to “kill” the story. The “targets” for silencing are identified, and the means that were used to silence them – some of them unimaginable by today’s standards – are described. It is because of Roswell and the methods employed to “kill” it that the Air Force and our government will never have a Day of Disclosure to reveal the truth about UFOs.
