

Human-Alien Contact Reports: New Case Studies & Evidence Support Alien Abduction

"The topic of alien abduction is complex and controversial. This book comes closer than others, bringing clarity to the haze of controversy." — Stanton T. Friedman, nuclear physicist, author of *Flying Saucers and Science*

San Francisco, CA (March 27, 2013) — Two long-established investigators and media experts in the field of alien abduction have produced a ground-breaking new book, *The Alien Abduction Files: The Most Startling Cases of Human-Alien Contact Ever Reported*.

Kathleen Marden and Denise Stoner lay out:

- Little-known details of alien experimental procedures
- Theoretical science that explains alien technology
- Messages conveyed by the ETs to abductees
- Vulnerabilities and benefits of living life as an abductee
- Evidence that alien phenomena are real

One of the hair-raising case studies is about two women who, separated by thousands of miles, tell common stories of their abductions, both supported by multiple witnesses and substantial evidence; both experienced missing time while driving with a companion, and were later taken from their homes. Unwilling participants in ongoing experimental procedures, they gave nearly identical descriptions of the crafts' interiors and technology, medical procedures, messages from the visitors, and the types of ETs they encountered. Even more startling, both have independently described finding themselves on identical huge craft, within the same timeframe.

About the Authors: Author, researcher and lecturer **Kathleen Marden** has more than 22 years' experience in the research and investigation of the alien abduction phenomenon. She is the niece of Betty and Barney Hill, whose story stirred world-wide interest. Marden has lectured at numerous conferences and appears on TV specials. She is coauthor of *Captured! The Betty and Barney Hill UFO Experience: the True Story of the World*; and the coauthor of *Science Was Wrong: Startling Truths About Cures, Theories, and Inventions "They" Declared Impossible*.

MUFON's Assistant Director of Abduction Studies, a MUFON Field Investigator and STAR Team member, and Director of the Florida UFO Research Group of UFORCOP, **Denise Stoner** holds educational forums for the public and private gatherings of abduction experiencers. Her involvement in the UFO field spans more than 20 years. She has lectured on the abduction phenomenon and appeared radio shows and on PBS TV.

Author Marden said, "I am attempting to understand the physical abduction phenomenon within the tenets of Western scientific thought. I look for acceptable evidence that a veridical experience occurred, such as eyewitness testimony, physical trace evidence, multiple witness lie detector testing, photographic evidence, personality screenings, and specific correlating data that is not commonly known, except by a few researchers."

Title: *The Alien Abduction Files: The Most Startling Cases of Human-Alien Contact Ever Reported*

Pub Date: March 20, 2013

Authors: Kathleen Marden and Denise Stoner

Foreword: Stanton T. Friedman, author of *Flying Saucers and Science*

Publisher: New Page Books, a division of Career Press

ISBN-13: 978-1-60163-271-5

Format: paperback, 6" X 9", 256 pages

Price: \$16.99

Distributors: New Leaf, Baker & Taylor, Ingram, Bookazine, Brodart, Nutri-Books, Partners Book Dist.

Information: www.newpagebooks.com, www.warwickassociates.net

Category: UFOs

Rights: World
