MONSTERS? ALIVE OR EXTINCT?

WHAT ARE GOVERNMENTS AROUND THE WORLD HIDING FROM US ABOUT BIZARRE CREATURES?

San Francisco, CA (March 1, 2013) — Anxiously awaited by his battalions of readers and fans comes a new barnburner from world-renowned, bestselling author and cryptozoologist, Nick Redfern.

For the first time, *Monster Files: A Look Inside Government Secrets and Classified Documents on Bizarre Creatures and Extraordinary Animals* opens long-hidden portals into the mysteries, conspiracies and cover-ups behind secret files in the Pentagon, the Kremlin, the British military and other government entities.

Monster Files answers the questions and many others:

- Does the Pentagon have the body of Bigfoot on ice?
- What is the U.S. military hiding from us about lake monsters?
- What is the link between the CIA and the abominable snowman?
- Why is there a British government file on sea serpents?
- What do the Russians know about animal ESP?

Redfern is one the world's most sought-after speakers and media spokespersons on the science of animals whose existence has not been proven (until now) and the existence of animals considered to be extinct. He has appeared on more than 100 radio and TV programs, from the BBC to Fox News, MSNBC and National Geographic.

Monster Files lays out the persistent rumors, tales, and legends that government agencies around the world have secretly collected, and the book reveals a wide variety of hair-raising data on bizarre beasts, amazing animals, and strange creatures.

No longer the subject of just folk tales and bedtime stories, Bigfoot, the Loch Ness Monster, sea serpents, psychic pets, the chupacabras, and abominable snowmen have all been sighted, documented and hidden from the public. In his inimitable, entertaining style, Redfern ferrets out this official, ultra-classified information.

Monsters, creepy creatures, and terrifying beasts really do exist—our governments know all about them—*Monster Files* exposes them.
