Is Death Truly the Final Chapter?

San Francisco, CA (June 1, 2012)-- What happens when we die? More than half of the world's population – followers of various Eastern religions and increasing numbers of Judeo-Christians – believe that we are reborn again on earth.

As interest in reincarnation grows, an urgent question arises: "Is there evidence?"

Renowned author Roy Stemman, a self-described "skeptical believer," tackles the issue head-on in *The Big Book of Reincarnation*. Using his skills as a professional journalist, Stemman examines and compares the best-documented case studies of reincarnation from around the world, *and* the leading scientific theories.

From the mountains of Tibet and the bayous of Louisiana, to a classroom in Lebanon where every child remembers his or her past lives, Stemman leads the reader deep into the lives of those who have experienced or been affected by reincarnation, while simultaneously investigating the leading theories posed by skeptics.

Fair-minded and far-reaching, *The Big Book of Reincarnation* is destined to become the definitive guide for those seeking answers to one of life's biggest questions.

About the Author: Roy Stemman is the widely respected investigative journalist and publisher of *Roy Stemman's Paranormal Review* www.paranormalreview.com, where his goal is to document increasing paranormal phenomena and spirituality in addition to commenting on current news events. He is also the author of several books, including *One Soul, Many Lives* (Ulysses Press, 2005).
