

INTERVIEW QUESTIONS

This Book is from the Future

By Marie D. Jones & Larry Flaxman

- Why did you choose to take on the subject of time travel at this point in “time?”
- What about time itself most surprised you in your research?
- Why are we only able to exist in linear time and follow the “arrow of time?”
- How did early science fiction novels help shape today’s inquiries into time travel?
- What role did Einstein play in early time travel research?
- What were some of the early theories about the possibility of time travel?
- Why are wormholes always such a hot topic when discussing time travel?
- What are some of the paradoxes that prevent time travel and why does going back into the past seem impossible?
- What current research is going on into time travel possibilities and where is it pointing us?
- How do ideas like parallel universes, the Multiverse and alternate dimensions increase the possibility of one day traveling through time?
- What time travel conspiracies have occurred and have any of them proved to pan out?
- How might we be “mentally time traveling” already and is there solid research to back this concept up?
- What other forms of time travel do we engage in including déjà vu, precognition and dreams?
- What are time slips and can you each describe your own time slip experiences?
- What are time shifts and how do they relate to earth changes and solar activity?
- What does the future hold for time travel, and when to most experts think we might achieve this feat?
- What is next on board for the two of you?
