

# BOOK SUMMARY

## ***The New Heaven and the New Earth***

By Imre Vallyon

---

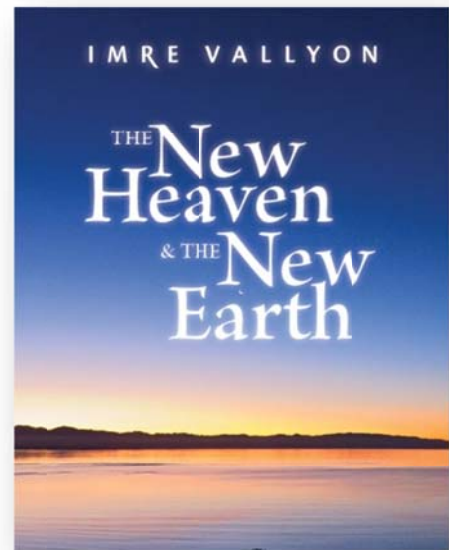

*The New Heaven and the New Earth* completes Imre Vallyon's trilogy started with *Planetary Transformation* and continued with *The New Planetary Reality*.

*The New Heaven and the New Earth* is in four parts. The eponymously titled Part 1 looks at the causes underlying the changes that the planet will go through, giving a big-picture view that encompasses cosmic happenings that are the root source of change and how they will play out in real-world events. These and other forces are converging and will manifest to create the New Earth, which will be either a Golden Age or a Dark Age, depending on how we respond to those forces.

Part 2, *The Way of Light*, contains valuable knowledge of the Spiritual Path that will help people deal with the coming changes, covering topics such as the development of consciousness, the forces of unification, spiritual warfare, the nature of Enlightenment and, on a more practical level, the reasons people get stuck.

Part 3, *The Way of the Mystery School*, is the author's response to the modern trend of so-called mystery schools being started in the West. It lays out the essence of what a Mystery School is, which is based on an esoteric understanding of the Kabbalistic Tree of Life, and lists the nine requirements (the Nine Pillars of Wisdom) of a true Mystery School. This part also compares faith-based and knowledge-based religious/spiritual systems and describes the four tests a spiritual aspirant must go through on the Spiritual Path.

Part 4, *The Way of Transformation*, is on a more spiritually advanced level, for those who have reached Soul-Consciousness and are on the way to Supernatural Evolution, the creation of a whole new Being. This part also reveals "The Secret of Death", which has to do with key opportunities in the after-death condition in which we can reach the goal of our Spiritual Journey and become enlightened.

Like the other two books in the trilogy, *The New Heaven and the New Earth* contains not only esoteric wisdom and knowledge but also practical meditation techniques—what people can do to prepare themselves spiritually so that they can work *with* the energy of change rather than against it, as those without this knowledge are likely to do. All the techniques in the book can be practised by anybody and the book contains links to audio files on the publisher’s website that give the correct pronunciation of the mantras.

Although the contents of *The New Heaven and the New Earth* may appear to be the results of painstaking research, nothing could be further from the truth. Not a single word in this book comes from an academic source; nor is it the product of philosophizing or intellectual conjecturing; nor is it channelled or obtained through psychism. The contents of the book have one, and only one, source: Imre Vallyon’s insight and perception based on Higher Consciousness.
