

BOOK SUMMARY

Unidentified: The UFO Phenomenon

By Robert Salas

Foreword by Stanton T. Friedman, author of *Flying Saucers and Science*

In 1969 the U.S. Air Force issued a statement that read, “No UFO reported, investigated and evaluated by the Air Force was ever an indication of threat to our national security.” This statement is patently false. It has been proven untrue by the testimony of many military officers and airmen and documentation of incidents involving UFOs and nuclear weapons, testimonies of which the U.S. Air Force was fully aware. *Unidentified* details many of these testimonies, some for the first time.

As partial justification for its position the Air Force cites a University of Colorado study that was contracted and paid for by federal funds.

Unidentified reveals how this study was actually just another part of the plan to cover up the reality of the UFO phenomenon. For the first time, *Unidentified* publishes evidence that the investigators for the Colorado study knew about the UFO-related missile shutdown incidents but did not investigate them or include them in their final report.

“There are two things I know about the UFO phenomenon. One is that real objects of unearthly origin are visiting our planet. [The other] is that the phenomenon of people being abducted is a reality.”

—Robert Salas
