

UFOS THREATEN U.S. NUCLEAR INSTALLATIONS

New Evidence from Aerospace Engineer/Air Force Vet

"I found Robert Salad to be a highly intelligent, deep thinker, a man of obvious integrity and principle with a disarming warmth and humility. After a long, successful career in the aerospace industry, he has studied the whole UFO subject in some depth and is now widely read on the subject."

—The Guardian, UK

San Francisco, CA (September 1, 2014) — Proving that the U.S. Air Force and other branches of the American military continue to cover up UFO incidents, a new book by a former Air Force and aerospace veteran lays out extensive testimony and documentation by military officers and airmen of their eyewitness accounts.

In *Unidentified: The UFO Phenomenon: How World Governments Have Conspired to Conceal Humanity's Biggest Secret*, Robert Salas describes more than six decades of hair-raising UFO occurrences, alien abductions and threats to military installations. He also presents ample evidence that the U.S. government and military have maintained absolute secrecy and distortion of the truth.

A graduate of the USAF Academy with a Masters Degree in Aerospace Engineering, the author retired from a career in the Air Force and in the aerospace industry. As Missile Launch Officer in Charge of nuclear-armed Minuteman missiles at Malmstrom AFB, he and others on duty watched as their missile base was shut down by a UFO. In a terrifying series of events, a glowing red disk hovered over each silo, disabling the triple-redundant systems controlling each missile; 24 hours later, technical crews were able to repair the systems and bring the missiles back online. The Air Force neither investigated the incident, reported it nor admitted that it happened—and that is when Salas launched an ongoing inquiry into UFOs, in particular as they relate to the military.

From incidents at Wright Patterson, Selfridge, Whiteman, Ellsworth and Beale Air Force bases to Camp New Amsterdam in the Netherlands and many more sites, the author has unearthed new material and verification of hundreds of UFO episodes. A trusted and long-established expert on the subject, Salas has appeared many times on

TV panels about the UFO/nukes relationship and has been a guest on CNN's "Larry King" show among other media appearances.

In the foreword for *Unidentified: The UFO Phenomenon: How World Governments Have Conspired to Conceal Humanity's Biggest Secret*, renowned author Stanton T. Friedman adds his backing to the importance of Salas' groundbreaking new book.

Salas said, "There are two things I know about the UFO phenomenon. Real objects of unearthly origin are visiting our planet, and the phenomenon of abductions is a reality."

About the Author: A 1964 graduate of the U.S. Air Force Academy, Robert Salas served seven years on active duty as a weapons controller. He flew target drones, commanded intercontinental ballistic missiles as a launch officer, and worked as an Air Force missile propulsion engineer on the Titan III program.

He has worked as a safety and reliability engineer for Martin-Marietta Aerospace and Rockwell International on Space Shuttle design proposals. And, until his retirement in 1995, he worked for the Federal Aviation Administration.

In 2005, he co-wrote *Faded Giant*, a book that details the UFO incident he witnessed at Malmstrom AFB. Salas continues to speak publicly about this incident and others at UFO conferences, and on the radio and TV.
