

IS ELECTROMAGNETIC ENERGY Destroying Our Health and Creating New Psychic Abilities?

*"One of the most acute commentators on the paranormal to appear
in recent years . . . "*

San Francisco, CA (November 1, 2014) — A popular author specializing in the paranormal, alien influence and the occult, Louis Proud is a scholarly researcher. His newest title, *Strange Electromagnetic Dimensions: The Science of the Unexplainable*, is all about the invisible electromagnetic network that affects us all in physical and psychological ways.

From the everyday to the mysterious, everything is tied together by a vast, invisible electromagnetic network. Natural and artificial sources of electromagnetic energy have transformed humans into electromagnetic beings, and as we continue to pollute and alter our electromagnetic environment, we are altering our bodies and our minds. The artificial, alien energies are shaping the way we think and the way we experience the paranormal, in both positive and negative ways.

The author contends that electromagnetic phenomena have created, in some people, a magnetic "sixth sense" similar to that of homing pigeons. "Electric people" have developed a sort of radar, a form of ESP that allows them to sense UFOs and to experience poltergeist disturbances, psychokinesis (the ability to move objects and levitate) and other paranormal occurrences.

Strange Electromagnetic Dimensions: The Science of the Unexplainable explores such questions as:

- *Are artificial electromagnetic fields, such as those emitted by power lines, destroying our health?*
- *Can being struck by lightning or suffering a severe electric shock result in the development of psychic abilities?*
- *What do scientists make of the fact that ball lightning can pass through walls, enter rooms by squeezing through keyholes, and display seemingly intelligent behaviors?*

- *Does electromagnetic energy cause spontaneous human combustion?*

Proud has found that electricity and electromagnetic energy affects our health and causes psychic experiences, and that electromagnetic webs may have an intriguing, pseudo-intelligent element.

Are cell phones creating electromagnetic pollution? Will we soon be seeking treatment for electromagnetic hypersensitivity disorder? Louis Proud lays out the evidence of these impending, startling conditions.

About the author: Louis Proud is a researcher who specializes in anomalous phenomena. His articles have appeared in *New Dawn*, *Paranormal*, *FATE*, and *Nexus* magazines, and he has been interviewed on such programs as VERITAS Radio, *Paranormal Realms*, and Whitley Strieber's *Dreamland*.

A resident of Darwin, Australia, Proud is the author of:

- *Dark Intrusions: An Investigation into the Paranormal Nature of Sleep Paralysis Experiences*
- *The Secret Influence of the Moon: Alien Origins and Occult Powers*
