

# BOOK SUMMARY

## ***Strange Electromagnetic Dimensions***

By Louis Proud

---

**E**lectromagnetic *Dimensions* looks at the environment, the human body, and certain aspects of the paranormal from an electromagnetic perspective. It shows how all things, from the mundane to the mysterious, are tied together by a vast—and largely invisible—electromagnetic web.

The first half of the book deals with electromagnetism in relation to the human body and the environment. I explain how the environment in which we live, previously featuring only natural electromagnetic fields, has been profoundly altered with the fairly modern introduction of artificial electromagnetic fields, thereby affecting all life on Earth, from honey bees to human beings. Some of the key issues I examine include: (1) How do homing pigeons and other animals use the Earth's magnetic field (geomagnetic field) for navigational purposes?; (2) Do human beings also possess a magnetic "sixth sense"?; (3) Can geomagnetic disturbances cause depression and other health problems?; (4) Is exposure to artificial electromagnetic fields—such as in the form of radio, radar, and power distribution—having a negative impact on our health and wellbeing?; (5) Is electromagnetic hypersensitivity a genuine rather than imagined condition?

The second half of the book deals with electromagnetism in relation to the paranormal and anomalous, with a focus on ball lightning, poltergeist disturbances, spontaneous human combustion (SHC), street lamp interference (SLI), and electric people. I examine the extent to which electromagnetism and the paranormal intersect, while keeping an open mind as to the possible involvement of other energies, such as Wilhelm Reich's orgone. Some of the issues I look at include: (1) Why do the themes of lightning injury and electric shock injury appear so frequently in relation to psychic ability?; (2) What is the significance of ball lightning, earth lights, earthquake lights and other plasmatic "energy forms" with respect to the UFO mystery?; (3) Can psychokinesis and other psychic abilities be explained in terms of electromagnetism?; (4) Has our use and abuse of electromagnetic energy altered the environment in such a way as to allow other dimensions—and the inhabitants thereof—to impinge on our own?
