

STORY ANGLES

Mind Wars

By Marie D. Jones and Larry Flaxman

1. The history of mind control from ancient times through the MKUltra period to today's cutting edge methods of programming and influencing human behavior. Discuss cults and secret societies and even the role of politics, religion and the media in modern social programming and mind control.
2. Surveillance and the fight for our privacy rights. Discuss how we have given up so many rights to our privacy for the sake of security from terrorism, etc. and how we are being constantly watched via cell phones, computers, drones, satellites and cameras.
3. Electronic harassment, microwave bombing, Voice to Skull...there are people called "targeted individuals" who claim they are being harassed by the government and shadowy figures using technology. Is this really happening and are these technologies real and even patented? Have they been used before by our own military, law enforcement and government?
