## *Mind Wars*

By Marie D. Jones and Larry Flaxman

---

From the dawn of humanity, the desire to control the thoughts, behaviors and actions of others has been a pervasive one. But few people know that mind control techniques have been around since the beginning of civilization. From the use of coercive persuasion by ancient Egyptians and the Knights of Templar, to MKUltra and the government's use of torture and mind control on unsuspecting human guinea pigs, to today's claims of electronic harassment and microwave "bombing," we have been at the mercy of "mind hacks" who wish to reprogram our thoughts, change our behaviors and reshape our beliefs.

The inner frontier of the human mind is the last bastion of privacy. But are we really in control of our own minds? And with today's cutting edge surveillance technology, including cyber stalking, cell phone hacks, drones, secret cameras and satellites, are we always being watched by those lurking in the shadows? *Mind Wars* examines these questions and more. The answers may shock you!
