

ABOUT THE AUTHOR

Nancy du Tertre

Nancy entered the UFO field through the backdoor. She was not interested in UFOs at all until June 19, 2011 when she witnessed a football-field sized boomerang-shaped craft covered in orange lights sitting motionless in the sky above a mall in Parsippany, New Jersey, near her home. Since then, she has since had many (less impressive) UFO sightings and also realized she had actually seen UFOs prior to that time.

Without realizing it, she had spent the previous decade slowly grooming her psychic/paranormal skills which would later become invaluable in her exploration of the UFO field. Nancy's interest in psychic phenomena did not happen until one day in the mid-1990's when she unexpectedly communicated with a dead spirit during a professional training session for psychotherapists. After that experience, she began a decade of training to become a practicing psychic detective, ultimately working with law enforcement and victims' families, a spiritual medium, a medical intuitive and remote viewer trained in military-style CRV.

Since that time, she has seen and photographed spirits, watched tables fly up into the air, watched physical items materialize, heard disembodied voices, and had prophetic dreams. Somehow she never imagined there could be a connection between the psychic world and the paranormal world of ghosts or the world of UFOs. She was very mistaken. They are all related.

Nancy's original life pathway was quite different. She was a highly analytic attorney practicing securities litigation in New York City who did not believe in psychics, ghosts or UFO's. She had also owned and operated several businesses including a French porcelain factory, a 242-bed skilled nursing home in Brooklyn, a printing company, and a health industry newspaper. Nancy trained for more than 15 years and is certified in Intuitive Gestalt Psychotherapy.

From 2010-2014, Nancy was the host of a CBS radio show called "*Hot Leads Cold Cases*" for four years. She interviewed many of the top experts in the fields of ufology, paranormal investigation, alien abduction, psychics/mediums, neuroscience, psychology, mind control,

astrophysics, astrobiology, law enforcement, CIA and FBI, remote viewers, complementary health care practitioners, OBE and NDE experiencers, and so on. She was also a regular weekly guest on *KAHI News* in Sacramento, CA, delivering weekly predictions about current events.

For many years, Nancy has taught psychic and mediumship development workshops in the New York tri-state area, and lectures on a variety of topics including psychic mediumship, remote viewing, securities litigation, health policy, alien communication, and the history of porcelain.

Nancy is a frequent media guest on radio and TV, and is a repeat guest on *Coast-to-Coast AM* with George Noory. She is the author of several books: “*How to Talk to an Alien*” (2015) (an in-depth investigation into “Exolinguistics”); “*Psychic Intuition: Everything You Ever Wanted to Ask But Were Afraid to Know*” (2011) (explaining psychic ability in terms of neuroscience, psychology and linguistics); “*Behind Criminal Minds*” (2012) (co-wrote memoirs of a NYC homicide detective); and “*The Art of the Limoges Box*” (2003) (an art history book).

She graduated *magna cum laude* with a BA degree in Romance Languages from Princeton University with an award for best thesis prize. She received her JD degree with honors from Pace Law School where she was a published member of the Law Review (article about corporate greenmail securities laws) and editor of the law school newspaper. She is fluent in French and trained in German and Thai languages.
