NEW EVIDENCE AND WITNESSES!

The Recovery of the Notorious Aztec UFO Crash and Secret Recovery

San Francisco, CA (December 1, 2015) — Researchers, authors and experts on UFOs, Scott Ramsey, Suzanne Ramsey, and Frank Thayer have put together incontrovertible evidence that an extraterrestrial spacecraft crashed near Aztec, New Mexico, in March 1948, and was recovered and hidden by the U.S. government.

Derided as a hoax for decades, the Aztec Incident has now been proven by the Ramseys and Thayer in their new book, *The Aztec UFO Incident: The Case, Evidence, and Elaborate Cover-up of One of the Most Perplexing Crashes in History*.

The Aztec Incident has been the subject of many TV documentaries. This is what happened in March of 1948:

A UFO was seen hovering over Los Alamos National Laboratory in New Mexico, and days later, a similar UFO was said to have made a controlled landing after being shot at by the military. Witnesses claim that more than a dozen humanoid figures were found and that the U.S. military removed the evidence to Wright-Patterson Air Force Base, hiding it in Hanger 18. Among witnesses who have come forward are NASA engineer, Bob Oechsler, and Fred Reed, an employee of the Office of Strategic Services.

Over decades, the authors traveled to many states to hunt down leads and witnesses, whose first-person accounts in the book are startling. Young oilfield workers on the scene climbed up on the 100-foot-in-diameter spacecraft and peered into the portholes before the military arrived, and their memories are surprisingly consistent, even fifty-plus years later. The interviewees affirmed that they were sworn to secrecy by the military.

The Aztec UFO Incident reveals the names of scientists who worked on the craft after its recovery, and the exact spot where the craft landed and how the saucer and the bodies were moved to the secret location. Visiting and revisiting the site, literally digging in the dirt, the Ramseys took samples to be tested. Tenacious and patient during years of searching, the authors discovered a remarkable cache of over 55,000 documents in an archive largely ignored, including classified documents from the CIA, FBI, U.S. Air

Force, and U.S. Army, constituting a cover-up that surrounded the Aztec story with a smokescreen of lies, misinformation, and destructive allegations.

Stanton T. Friedman, author of *Flying Saucers and Science*, said, "This is a fascinating and carefully done exposé well worth reading. A very important book setting new standards for investigation, persistence, and the casting of a very wide net to locate witnesses. There will be shrieks of distress from both noisy negativists and pro-UFO types who have been unwilling to maintain the Aztec story in their 'gray basket.' It is not gray anymore."

About the Authors: Working on the Aztec story since 1987, **Scott Ramsey** is the foremost researcher into the incident, discovering previously unearthed documentation and pursuing interviews throughout the United States. An electrical engineer specializing in magnetic fields, he has worked for Fortune 500 companies and is currently Vice-president of Sales and Marketing for Express Wire Services. A favorite media guest, he has appeared on the History Channel documentary, "The UFO Files" and on many radio and TV programs.

Traveling extensively to interview witnesses and pursue Aztec research at university and USAF archives, **Suzanne Ramsey** was the host of a radio show where she met her husband, Scotts Ramsey; and she has been a frequent media guest.

Frank Thayer, PhD, is a New Mexico native with extensive journalistic and journalism education experience. Now a professor emeritus at New Mexico State University in Las Cruces, he is a professional writer, editor and photographer.
