

Story Angles

Raindrops of Love For a Thirsty World

By LIFE, as shared with Eileen Workman

Self-help Angle:

Do you ever feel trapped in repetitive and unhelpful behavior patterns? Is your life sometimes negatively affected by persistent feelings of insecurity, resistance, fear, rejection, anger, frustration, or aggression? Do your thoughts on occasion seem locked in loops involving judgment or painful disgust—either directed at you or at others?

If so, *Raindrops Of Love for a Thirsty World* provides a gentle and instructive antidote to these problems. Offered up as a “channeled” gift from the essence of Life to the whole of humanity, *Raindrops Of Love* shows us how we might transform ourselves as individuals—and by extension as a species—by tenderly forging a pathway for our inspired self-realization. Additionally, it waters our imagination with a number of useful methods for how to practice healthy and gentle (thus sustainable) self-discipline. The book further encourages us to creatively self-express to the highest of our own unique capacities, and to do so in responsible and life-affirming ways. Ultimately, it extends to us Life’s loving and irrevocable invitation to accept the freedom being offered to us through our own evolved self-mastery. *Raindrops Of Love* encourages every one of us, no matter our present circumstances, our past sufferings, or our imagined future challenges, to become increasingly life-aware as a means for transcending the limitations of human self-centeredness.

Evolutionary/Philosophical/Spiritual Angle:

It’s been suggested that change is the only cosmic constant. Yet at times change seems like the hardest thing for us humans to accept. We gaze into the unknown abyss with wary eyes, hoping to peer beyond the cloaked darkness so we can know to where we are headed *before* we arrive.

Raindrops Of Love for a Thirsty World shines the light of love on the journey into the truth of our perfect aliveness. Inspirational and uplifting throughout, this book bathes us in the trust, openness, courage, compassion, kindness, patience, and peace that is our birthright, as divine and

precious aspects of the Formless One Life. Even so, *Raindrops Of Love* does not shy away from pointing out how we might elevate our own feelings, thoughts, and actions to mirror the boundless and precious creative human potential that we each contain. Indeed, this book reminds us that perfection is a process and not a destination, and that our only need is to fall in love with our own eternal journey, which is Life's irrevocable gift to each of us.

Feminine Inspirational Angle:

“Western Women can come to the rescue of the world.” So said the Dalai Lama in September of 2009 as he pointed to the advanced educations, financial advantages, enhanced capacities, and relative freedoms presently embodied by those women who have come into their own surrounded by the abundance that permeates the Western World. *Raindrops Of Love for a Thirsty World* affirms the likelihood—and indeed, posits the evolutionary necessity—of that outcome, for it suggests that we are being held back by the continued suppression of the divine feminine within us all.

Written from the gentle perspective of the Life Force speaking directly into the heart and soul of each reader, this book encourages us to move beyond our rapidly collapsing patriarchal social systems, to gaze beneath the political and economic hostilities caused by our present painful experience of duality, and to transmute the internal suffering caused by the ongoing war between our individual masculine and feminine aspects. *Raindrops Of Love* does not seek to shame, blame, or aim guilt at the patriarchy for the limitations or challenges we presently face as a species. Rather, it serves as a call to love, and provides us with the means for us to wed our mental and emotional (mind and heart) selves in a holy communion, with self-awareness serving as the minister and observer of this rite.
