Will the Crystal Skulls Ease 21st Century Suffering?

Or Is it Too Late for Them to Heal Today's Declining Human Race?

by **Klaire D. Roy**

Director of The Medicine Buddha Mandala Institute, Montreal

We are not alone in the universe. Evolved beings have offered us valuable tools with which to progress on spiritual, physical, technological, and scientific planes. At this time of discord and unrest on our planet, I find it comforting to know that we have the support of spiritual teachers from faraway places.

The Words of a Tibetan Master

I learned the startling, yet inspiring, news of our ancient ancestors while I was communicating with the Tibetan Master, Djwhal Khul. In a state of meditation, I encountered the 200-year-old Master, whom I call DK, and whom I later met in person. He lives in a high level of consciousness, a level that is nearly impossible for most of us to comprehend.

At first a little intimidated, I ultimately gave in to his deep upwelling of love and profound knowledge. As I surrendered to becoming an instrument of his wisdom, he fundamentally changed my perception of the universe and of humanity. I learned how I, and the Daikomyo-zo Chenrezi crystal skull, could help mankind to understand the true nature of our purpose as humans, and how we can bring this enlightenment to other souls on earth.

The Crystal Skull of Compassion

In a years-long collaboration with DK, I found out about the detailed of his discovery and of his study of the Daikomyo-zo Chenrezi crystal skull (also known as the Tsoraigkejourg skull), and of the other twelve skulls. He has decrypted the skulls, and described their origins, purposes, and abilities to enable the transformation of mankind. The result of his knowledge is my new book, *The Crystal Skull of Compassion*, which describes the mission of each of the 13 skulls, some of which are world-famous for their power and influence. I also go into the relationship of the skulls to the time and place of Atlantis, and their value to us, here in the 21st century, as we grapple with upheaval across the globe.

Transferred to earth by beings who lived during the millennia preceding ours, the thirteen skulls are receptacles that contain information and an atomic Light. In the book, I describe the Daikomyo-zo Chenrezi skull, which originated in the distant constellation of Canis Major. Known only to a small group of people who are open to this level of insight, this skull is programmed specifically to heal today's scarcity of love and to encourage compassion, particularly as applied to our current medical and social systems.

In the future, we will come to understand and receive the energy and universal wisdom of the skulls, awakening our consciousness, and transforming our physical, emotional and spiritual well-being. The Daikomyo-zo Chenrezi skull and the other crystal skulls are guides from which we can tap into boundless energy, and begin to see and experience life in a new light.

Real or Fabricated Skulls?

With the 2008 release of the mainstream film, "Indiana Jones and the Kingdom of the Crystal Skull," overnight, crystal skulls became well-known to millions of movie-goers, who were mystified and fascinated by the idea of powerful skulls from ancient ancestors.

Before the movie, the original crystal skulls were known and studied only by those in spiritual circles. And even many of these students of the skulls were unaware that the vast majority of crystal skulls exhibited in museums, and used in various mind-body-spirit seminars, were fabrications. Only thirteen skulls have authentic, planetary origins, with the Mitchell-Hedges crystal skull and the Daikomyo-zo Chenrezi skull being the best-known.

Looking to the Future

In fact, most of the skulls remain inactive, as humans remain immature and materialistic. Nonetheless, the energy and the guidance of the active skulls are supporting us all in the on-going process of our spiritual growth.

It is comforting to know that we are not alone, and that in the future, all of the skulls will emerge to heal, to teach us compassion, and to act as bridges between our material world and higher planes.

I would like to acknowledge the generous beings from beyond who have transcended human form, and who comprise a brotherhood that is working for the evolution of humanity. The skull that is the focus of this book is an opportunity for those who have the inclination and the meditative talent to tune into and take advantage of the higher learning that it makes available.
