

INTERVIEW QUESTIONS

The Déjà vu Enigma

By Marie D. Jones and Larry Flaxman

- What is déjà vu and are we any closer to understanding how a déjà vu experience occurs?
- What are the potential connections between déjà vu and parallel universes, alternate dimensions and other realities?
- What is our current understanding of memory and how the brain stores and recalls it?
- Are the brain and the mind two separate things? What evidence is there for pro and con?
- Does the mind have the power to kill or heal?
- What is the role of belief in the perception of reality, both individual and collective?
- How does the brain perceive time, and is this perception accurate?
- What might be happening to us during missing time, a fugue state, or even amnesia?

- Is there a part of the brain responsible for the perception and experience of paranormal phenomena?
- How does our brain access and process information, and where might that storehouse of information be?
- What is the concept of the Grid and how is the brain, mind and consciousness tied into the Grid of reality?
- Is reality the same for all of us?
- How do we alter our consciousness to experience other levels of reality?
- Are we any closer to truly understanding how our minds work, and what can we learn from the ancient philosophers, sages and teachers?
- What does the most cutting edge research into Noetics and consciousness tell us about the power of thought and intention?
- What is your newest project, “The Trinity Secret” about and what else are working on for your ParaExplorers venture?
