The Key to Bridging Science and the Supernatural?

New Research into Vibration and the Zero Point Grid

"The new physics will have to account for a field of consciousness, and it may have to deal with the idea that intelligence and awareness [do] not require a physical body in the sense we are used to."

—CLAUDE SWANSON, author of *The Synchronized Universe*

San Francisco, CA (April 15, 2009) — Best-selling author, Marie D. Jones, and paranormal researcher, Larry Flaxman, are following their series of blockbuster titles with a revolutionary new vision of what may be the holy grail of science and the paranormal. Their new book, *The Resonance Key: Exploring the Link Between Vibration, Consciousness, and the Zero Point Grid* opens the door to what scientists and paranormal researchers alike are realizing, that resonance is the theory that bridges the gap between science and the supernatural, and explains every facet of reality in between.

A riveting read, the book dives into the most amazing new ideas, theories, and research that link vibration, mind, and matter, including:

- What ancient civilizations knew about resonance and the use of vibratory patterns found in art, nature, and science, and how they incorporated resonance into their sacred temples, megaliths, and churches.
- The most cutting-edge research into the brain and human consciousness, and their roles in perceiving, and creating reality.
- Why the Zero Point Grid may be the most foundational infrastructure of reality itself.

As physicists search for a Theory of Everything, Jones and Flaxman's resonance theory explains the vast unknown, from UFOs, ghosts, and cryptoids to clairvoyance, remote viewing, and teleportation.

Jones said, "What if the true nature of reality were like an onion, made up of layer upon layer that, when peeled back, revealed a creative, self-regenerating, weblike core, a center that could contain the whole of all that is, was, and will be?"
