

ABOUT THE AUTHOR

Marshall Vian Summers

FOR THE PAST TWENTY-FIVE years, Marshall Vian Summers has been in the process of providing a preparation to sustain individuals and societies through the difficult and uncertain times ahead. Marshall's writings, including *The Great Waves of Change*, are being read

and studied by growing numbers of people around the world, with existing translations in eight languages.

His many books and writings speak of a spiritual force within each person that has the power to unite a divided humanity and enable us to face a world in decline and a future of unknown trials and opportunities.

In *The Great Waves of Change*, Marshall presents a new vision of humanity's destiny in a larger Universe of intelligent life and an urgent call to prepare individually and collectively for the Great Waves, a converging set of worldwide challenges. These include growing economic hardship and instability, catastrophic climate change, resource depletion and escalating conflict around the world.

In his larger work, Marshall is providing a new spiritual teaching focused on preparing for the Great Waves of change, for contact with a Greater Community of intelligent life and for connecting to the deeper intelligence within each person, called Knowledge. It is this Knowledge and preparation that each of us will need in order to navigate the difficult and uncertain times ahead. As nations, cultures and religions clash and become more unstable, men and women everywhere will need a strong, inner foundation to guide their actions, to assist one another and ultimately to forge a new way for the human race.

Marshall resides with his wife and family in the foothills of the Rocky Mountains in Colorado. He travels widely to present his message of vision and preparation, one both alarming yet inspiring in its implications, to audiences around the world.
