

# INTERVIEW QUESTIONS

---

## *AD: After Disclosure*

By Bryce Zabel and Richard Dolan

- What brought you into the study of UFOs to begin with?
- Why do you believe there actually is a genuine UFO phenomenon, not simply some sort of culturally derived phenomenon, or people simply not understanding things they see and getting overly excited?
- What evidence is there for a UFO cover-up?
- Given that the cover-up is so long established, why do you think it would ever end? What would cause it to end?
- In the event of the end of UFO secrecy, would this actually be a big deal? Wouldn't people eventually settle down and life would continue as always, albeit with a new twist?
- What are the most likely institutions to be affected by the end of UFO secrecy?
- Is panic something likely? And if so, how bad?
- How might the world After Disclosure look in terms of culture? In other words, how might our values and beliefs be changed?
- Who are these beings, anyway? Who or what is behind the UFO phenomenon?
- Do we have anything to worry about?
