

# KEEP OUT!

*By Nick Redfern*

## BOOK SUMMARY

KEEP OUT! is a study of worldwide secret government and military installations such as the United States' Area 51, Hangar 18, the Dulce, New Mexico underground base, and the HAARP facility in Alaska; Royal Air Force Rudloe Manor in England; China's secret Sanya installation; Australia's Pine Gap; Russia's very own Area 51; and even claims that there is a secret base on the far side of the Moon. The book details groundbreaking testimony and official documentation that reveals the involvement of the above installations (and many more) in such areas as UFO investigations, the War on Terror, the 2012 controversy, biological-warfare and exotic virus research, secret aircraft, alien autopsies, controlling and manipulating the weather, and fringe research into teleportation and invisibility. Keep Out! reveals the secrets of underground installations, classified bases, and off-limits government-controlled facilities all around the globe.
