

AUTHOR BIO

Marshall Vian Summers

MARSHALL VIAN SUMMERS is the founder and messenger of the New Message from God, a spiritual tradition practiced in over 35 countries which teaches about the One Spirituality of humanity and our future and destiny in a "Greater Community" of intelligent life in the universe.

For over 30 years, Summers has lived in relative solitude, receiving and teaching what he says is a message from the Creator sent for the protection and advancement of the human family. Now over 9,000 pages in length, Summers' mystical body of work has been translated into 16 languages and is studied by people around the world.

Marshall Vian Summers' newest revelation is called *Life in the Universe*, which Summers says is a divine communication revealing the interactions, trade and travel of intelligent life beyond the borders of our solar system and the greater spiritual destiny of all sentient life in the universe.

According to Summers, every word, paragraph and chapter of *Life in the Universe* was delivered in a lightning flash of communication that lasted just 3 days. The words of *Life in the Universe* were originally spoken, then recorded, transcribed and published without editing or alteration. According to Summers, we are now able to read the direct words of an original revelation, uncorrupted by human institutions or religious leaders – a message from the Creator, who wishes to reveal to humanity the true reality and spirituality of life beyond our world.

Life in the Universe is part of the New Message from God, a vast library of sacred texts and spoken revelations many of which have been released on book and CD and are available at newknowledgelibrary.org.

The New Message from God has become the foundation for a religious movement that spans the globe. The Worldwide Community of the New Message provides many educational offerings, including a free online school, forums and live broadcasts, international events and an annual Encampment high in the mountains of Colorado where students from around the world gather to study the revelations of *Life in the Universe* with Marshall Vian Summers.
