**San Francisco, CA (January 22, 2013)** — Have non-human beings visited and perhaps copulated with primordial humans? Were they reptilian intelligences that created mixed-blood humans?

Ancient cultural, historical and religious records indicate that it did happen, and that the beings were reptilian in nature—or, at the very least, they have been represented throughout human history in reptilian form. In *The Secret History of the Reptilians*, Scott Alan Roberts investigates the unavoidable presence of the serpent in human history.

From the serpent, Nawcash, in the Garden of Eden to Atum, the Egyptian snake-man, and from Quetzalcoatl, the feathered serpent god of the Mayans to the double-helix snake symbol of Enki/Ea in ancient Sumerian literature, the serpent has been an omnipresent link between humans and gods in every culture.

Roberts examines in depth a race of beings that visited earth, millennia past, for the purpose of cohabiting and manipulating humans. Using a scholarly approach blended with light-hearted intellectualism, he unearths accounts in the book of Genesis and in myriad other religious, cultural and spiritual belief systems.

Lavishly illustrated with photos and graphics, *The Secret History of the Reptilians* answers many questions, including:

- *Who are the Reptilian-Humanoids?*
- *What do they look like? Can they be identified today?*
- *Where does evidence of the Reptilians appear in the Bible*
- *Where in the galaxies and on the planet are places that link to Reptilian origins?*
- *Are the Nephilim linked to Reptilian races?*
- *What is the Nazi connection to the Reptilians?*

The author writes: "*Humanity was visited by non-human entities that from the very beginning introduced an alternate bloodline that has carried all the way down the historical record to the current day, the bloodline of the serpent.*"
