

Overwhelming evidence of life after death

“The Life After Death Project”

“THE LIFE AFTER DEATH PROJECT is a great documentary on a timeless theme. It is a fascinating film and a true-life enigma that begins with one small, odd incident and mushrooms into a huge, scientific investigation of apparent messages from the ‘Other Side.’ It is also the first “paranormal bio-pic” – the Afterlife Story of Forrest J Ackerman, a founding father of Hollywood science-fiction who refuses to rest in peace...” - Pete Hammond MOVIELINE

Los Angeles, CA (April 30, 2013) — Renowned filmmaker Paul Davids unleashes an astonishing breakthrough film about life after death to be broadcast on the Syfy Channel May 15, with a 2-disc Collector’s Edition DVD (including this film and its equally compelling sequel) releasing nationwide on July 16. Interviews with New York Times best-selling authors (Richard Matheson, Whitley Strieber, Dannion Brinkley, Michael Shermer), top science professors (Dr. Gary E. Schwartz and others) and selected world famous mediums provide scientific evidence and testimony on how deceased people can and do communicate with us.

Davids takes us on a goose-bump inducing investigation of the extraordinary case of after death communication (ADC) with Sci-Fi luminary, Forrest J Ackerman. “Uncle Forry” was a skeptic about life after death. But he promised close friends that if it turned out he was wrong, he would try to “drop them a line” from the ‘Other Side.’ The documentary evidence of what happened has to be seen to be believed.

The sequel film “The Life After Death Project 2 – Personal Encounters” features spell-binding accounts of personal encounters with life after death from archaeologists, physicists, a retired colonel, a librarian, clinical psychologist, sales executive, publisher and doctors and nurses who have worked with hundreds of dying patients. They have seen souls leaving the body at death, angelic beings, spirit entities, golden orbs, physical manifestations and more. It includes updates on the continuing saga of the Forrest J Ackerman case.

Dauids is an award-winning documentary filmmaker whose films include “The Sci-Fi Boys” and “Jesus in India”. His credits include 79 episodes of the original “Transformers” TV shows and co-author of six Star Wars sequel books for Lucasfilm and Random House (written with his wife, Hollace, who with Anne Strieber is executive producer of “The Life After Death Project.”) He is also known for executive producing and co-writing Showtime’s original TV movie, “Roswell,” which was nominated for a Golden Globe as Best Motion Picture for Television.
